

AMENDMENTS

Listing of Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Previously Presented) A double hinge for use in attaching a top cover to a cassette having a pair of opposing side walls, a pair of opposing end walls and a bottom wall, said hinge comprising:

 a first horizontally oriented hinge interconnected to either an end wall or a side wall and the top cover dividing said end or side wall into upper and lower halves; and

 a second hinge oriented in juxtaposed relationship to said first hinge dividing said top cover into two interconnected pieces wherein the piece of the top cover attached to said end wall or side wall is of the same general dimensional size as said end wall or side wall to which said cover is attached to by means of said first hinge;

 whereby said hinge allows said top cover to lay flat upon a same surface which said bottom wall also rests upon.

25. (New) An assembly of two hinges for use on a container having a top, a bottom and pairs of opposing sides said assembly comprising:
- a first hinge pivotally connected to a side or top of said container, said first hinge also pivotally connected to a hinge plate;
- said hinge plate pivotally connected between said first hinge and a second hinge;
- said second hinge pivotally connected to said hinge plate and to said cover
- said first hinge, said second hinge and said hinge plate configured and interconnected so as to allow said second hinge to be moved from a first position to a second position wherein said second hinge is located within the same general horizontal plane as said top and said bottom as well as the same general vertical plane as said first hinge, when in said second position.
26. (New) The assembly of claim 25 wherein said hinge plate is a portion of said top of said container.
27. (New) The assembly of claim 25 wherein said hinge plate is equal in length to the length of one of the opposing sides.
28. (New) The assembly of claim 25 wherein said hinge plate is equal in width to the width of one of the opposing sides.
29. (New) The assembly of claim 25 wherein said hinge plate is equal in width to one half of the width of one of the opposing sides.
30. (New) The assembly of claim 25 wherein said hinge plate contacts a portion of one of said opposing walls when said second hinge is placed in said second position.

31. (New) The assembly of claim 25 wherein said hinge plate contacts a portion of one of said opposing walls when said top is folded beneath said bottom.
32. (New) The assembly of claim 25 wherein said cover has a latch connected thereto.
